VOLUME 34: No. 5

Authorized as Second Class Mail, Post Office Department, Ottawa
ACME, ALBERTA, THURSDAY, MARCH 10th, 1955

\$1.50 a Year; 5c a Copy

Mrs. Joe Boudreau (nee Edith Lammle) and two girls of Penny, B.C. are visiting at the home of their grandparents, Mr. and Mrs. C. Graham

Flying Officer Jones and Miss Pat Boake were weekend visitors at the home of Mr. and Mrs. Harry Hunt, Flying Officer Jones and Flying Officer Hunt having trained together.

We regret the report of the wedding and reception of Mr. and Mrs. Hugh Isaac reached us too late for this week's paper. Our next issue will have a full account of this as well as the community party for them will appear in our next issue.

BANKING HOURS

Commencing March 12, 1955 this branch will be closed each Saturday to give the staff the benefits of the five-day week. For the convenience of customers the bank will be open extra hours each Friday from 4:30 p.m. to 6 p.m.

We seek the co-operation of customers in accomodating themselves to this change in banking hours.

Bank of Montreal,
Cliff Hood, Manager.

BORN—To Mr. and Mrs. Danny O'Neil (nee Shirley Brown) a daughter, Brenda Charlotte, 8 lbs. 5 ozs. Feb. 13th in Edmonton hospital.

Mr. and Mrs. E. J. Martin received a letter from their son, Arnold who is in Calcutta, India. Arnold said he is fine and likes it fine. The weather's good there. Patsy Poole is a patient in the Drumheller hospital.

Mrs. E. J. Martin of Carstairs, who has been in Bismark, North Dakota for almost six weeks to help Mrs. Edwin Martin care for the mother-in-law who is suffering from a stroke, has returned home. While in N. Dakota, Mrs. Martin also visited a little in McLusky and Turtle Lake, N. Dakota on her way home. The weather was grand most of the time.

OTTO PALLESEN

Funeral services were held on Saturday, March 5th at 11 a.m. for the late Otto Pallesen in the Carbon United Church. Rev. Sme theram officiated.

Pallbearers were his oldest neighbors and friends: J. Nielsen, A. Church, Bob Reid, Martin Sember, D. Edmondson, A. Everett, all of Hesketh.

Interment followed in Mountain View Gardens, Calgary. Winter Bros., Drumheller were in charge.

ANGLICAN NOTES CARBON

Church Services in Christ Church Sunday, March 13th, Evensong at 7:30 p.m.
Services every Wednesday evening through Lent at 7:30 p.m.
Church School Saturdays at 2:30.

Flying Officer Howard Hunt returned to Winnipeg where he is stationed with the R.C.A.F. He has been on leave at the home of his parents, Mr. and Mrs. Harry Hunt for the past two weeks.

The monthly meeting of the Senior Group W. A. of the United Church was held on Wednesday, March 2nd. Plans were made to serve the evening meal to the Presbytery Meeting on March 3. Also plans for the turkey supper which is to be held on Saturday, March 19th at 5:30 p.m. Adults \$1. Children under 12 years 50c. Walter Gieck is home again after two weeks in the Drumheller hospital.

Ralph Pallesen met with an accident on Sunday on No. 9 highway causing considerable damage to the car and a few scratches to a couple of the passengers.

Albert Bramley had the misfortune to lose his brooder house and 200 chickens when fire destroyed them in the early hours of Sunday morning.

Mr. and Mrs. W. B. Ward of Sheerness were visiting at the home of Mrs. Ward's grandmother, Mrs. Vanover.

IN MEMORIAM

In loving memory of Mother, Mrs. Helena Mary Skerry, who passed away March 10, 1954.

"Our lips cannot tell how we miss her;
Our hearts cannot tell what to say.
God alone knows how we miss her,
In a home that is lonesome today.
Ever remembered by Myrtle and Frank Emery.

Work is proceeding on Christ Church, Carbon and is expected to be completed next week

CARD OF THANKS

Mrs. Norma Pallesen and family wish to thank our many friends and neighbors for the beautiful floral tributes and kind expressions of sympathy shown during our recent sad bereavement. Especially Rev. Smitheram, solicitor Donald Gordon, organist Mrs. Torrance, Winters Funeral Home and pall bearers.

CARD OF THANKS

I wish to thank everyone for the lovely flowers and cards I received while I was a patient in the hospital.

Mrs. Otto Hoff.

Mrs. McLeod, our local assistant telephone operator, was a weekend visitor to Calgary.

Please pay the subscription for your paper to your local agent, Mrs. D. Hunt, Carbon.

IN MEMORIAM

OHLHAUSER—
In loving memory of a beloved Dad and Granddad, Adam Ohlhauser, who passed away March 10, 1954.

"They say time heals all sorrows,
And helps us to forget
But time so far has only proved
How much we miss him yet.
God gave us strength to take it
And courage to bear the blow,
But what it meant to lose him
No one will ever know."

Sadly missed by Earl, Edith and Grandson, Allen.

THERE'S MONEY FOR FERTILIZER at the B of M

The purchase of fertilizer is sometimes a headache. Because the need for it usually comes at a time when there are a lot of expenses and little income.

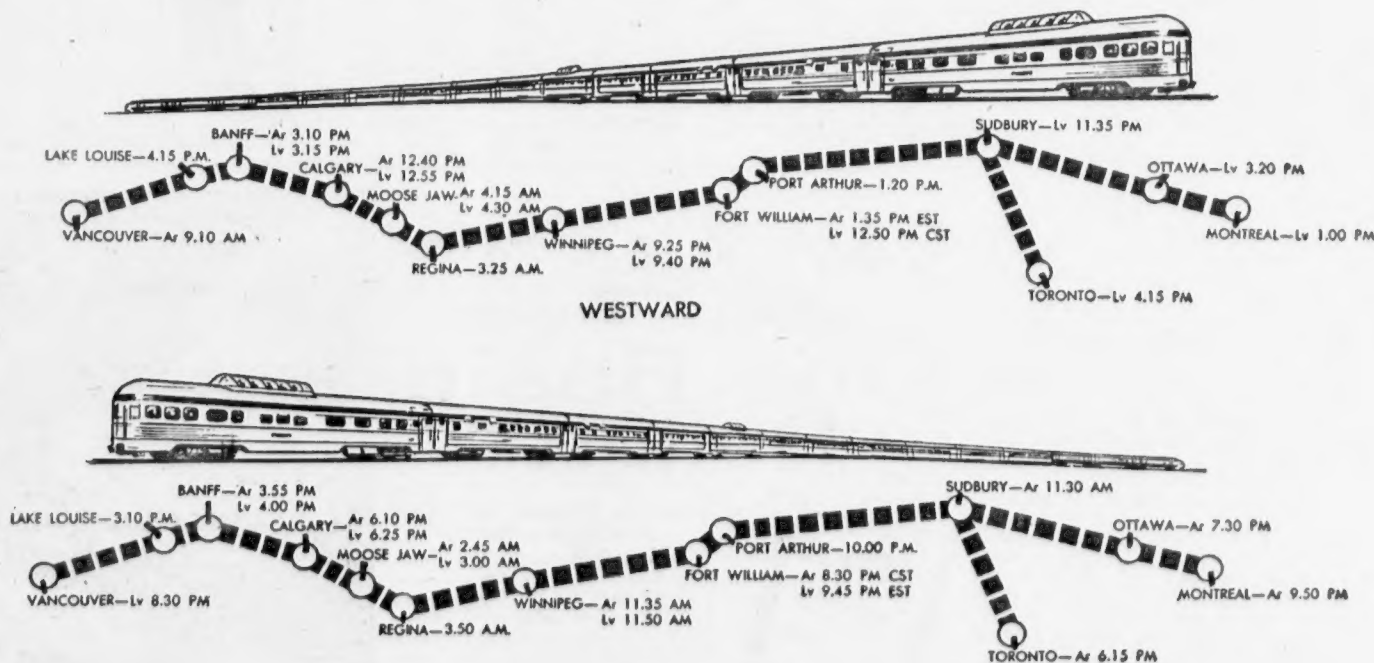

Avoid that headache this year. See your B of M manager about a loan. Repayment terms are easy—suited to a farmer's requirements. Drop in at your nearest B of M branch today, or as soon as convenient.

WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1817
AD104

SPANS CANADA IN 3 NIGHTS

This diagram illustrates the schedule which the Canadian Pacific Railway's new "dome" streamliner "The Canadian" will follow to cross Canada in three nights travelling time when the stainless steel train goes into service on April 24. Under the new schedule, Sudbury will be a mere six hours and 15 minutes

out of Toronto; there will be only one night on the train between Montreal or Toronto and Winnipeg; Calgary will be little more than an overnight hop from Winnipeg; and Vancouver will be reached early in the morning of the fourth day. "The Canadian", powered by diesel locomotives, will feature: Skyline coaches with reclining chairs equipped with head rests and full-length leg

rests, which are reserved without extra charge, scenic dome-coach-coffee shops in which meals or snacks can be obtained at popular prices, luxurious dining room cars; "Manor" and "Chateau" sleeping cars with a wide variety of accommodations; and the fascinating new scenic dome lounge cars.

6300 children aided by Red Cross

This bonny boy is ready to walk and run like other four-year-old boys. In 1951 he was a wee baby with club feet, and for three years (a total of 362 days), he was in and out of the Junior Red Cross Hospital, Regina, where he had special operations and casts which resulted in two straight, strong feet for him. He is just one of over 6,300 crippled and handicapped children who have been helped to health and happiness by medical skill, education and care provided by the Junior Red Cross of Saskatchewan since 1920, when the Juniors arranged for the treatment of their first patients.

Care for crippled children is only one part of the work undertaken by Saskatchewan's 124,996 Junior Red Cross members in 5,361 classrooms. Other projects include the promotion of health, help for needy children abroad and the development of international friendship. The Junior Red Cross is active in 62 countries.

U.K. prize Herefords for Jubilee

LONDON.—British cattle breeders have hailed as a "most generous gesture" an offer of financial help from the Hereford Association of Canada and the Saskatchewan Show Committee that will enable them to send prize Hereford cattle to Saskatchewan's Golden Jubilee celebrations in Regina.

The British breeders who now plan to ship about 25 Herefords from a Scottish port to Canada early in May previously thought they would be unable to do so because the American Hereford Society boosted its ancestor checking fees.

"The plan is on again because of a most generous gesture on the part of the Canadians," R. J. Bentley, secretary of the Herd Book Society, said.

"We had not counted on the Canadians. As soon as our decision (not to send the cattle) was announced, the Hereford Association in Canada and the Saskatchewan Show Committee cabled offers to pay any registration fees required by the Americans. We have accepted this offer with pleasure and our top breeders are rallying around to send a representative display."

BIG INCREASE

REGINA.—Saskatchewan government statistics indicated the value of oil produced in the province last year would total more than \$8,000,000, compared with about \$3,000,000 during 1953.

The mineral resources department estimated oil production in 1955 would total about 10,000,000 barrels, and natural gas reserves at one trillion cubic feet.

There were 18 oil and nine natural gas discoveries in the province last year.

Holystone is a soft kind of sandstone used by sailors for scrubbing and cleaning the decks of ships.

3130

All costs of Junior Red Cross administration are provided for by the Senior Red Cross. This makes it possible to use every cent contributed by children for Crippled Children's Work or Overseas Relief.

The Red Cross on a schoolroom window signifies a Junior Red Cross Branch under the guidance of a Teacher-Director, who is a recognized Red Cross volunteer. Branches are provided with materials, so that programmes may be rich in valuable learning experiences for the youthful members.

The Junior programme is only one of the many projects operated by your Red Cross. Day by day, the Society is rendering vital services to those in dire need. It offers the helping hand that you would extend, if you were there. No one knows what may happen tomorrow and Red Cross must be ready to meet any and all demands for its humanitarian service.

ALBERTA BUTTER

Alberta is exhibiting a 56-pound box of butter in the Scottish Dairy Show at Glasgow, Scotland, in February. It will compete with entries from other British Empire countries expected to be in the competition.

VICTORIA.—Victoria police constables may go back to wearing the London bobby type of helmet that was discarded five years ago. The Chamber of Commerce will urge the authorities to re-issue the headgear.

Livestock marketing hearings set

REGINA.—Gordon Loyeridge, chairman of the Saskatchewan Marketing Board has announced that definite dates and locations have been set for public hearings to receive representations by interested persons and groups respecting a proposed plan for the marketing of livestock in Saskatchewan.

The proposed plan has been submitted in accordance with the provisions of the Natural Products Marketing Act, and hearings will be held as follows:

Saskatoon: Odd fellows' Hall, Monday, March 7.
North Battleford: Public Library, Wednesday, March 9.
Prince Albert: Legion Hall, Friday, March 11.
Tisdale: Legion Hall, Monday, March 14.
Yorkton: Castle Hall, Wednesday, March 16.
Maple Creek: Community Hall, Monday, March 28.
Swift Current: Legion Hall, Tuesday, March 29.
Moose Jaw: Legion Hall, Thursday, March 31.
Carlyle: Memorial Hall, Monday, April 4.
Regina: Oddfellows' Hall, Tuesday, April 5.

Sittings will commence at 10.00 a.m. and hearings at Saskatoon, Yorkton, Swift Current and Regina will be extended to the following day, in each case, if the number of representations to be made requires the additional time.

Those wishing to make representations would assist the board by advising the secretary at least one week in advance and also by submitting copies of the written briefs to be presented (six copies if possible).

Further information may be obtained by writing to W. F. Ferris, Secretary, 309 Legislative Buildings, Regina.

Seed grain must be clean

The results of provincial seed drill surveys made in 1954 are strikingly similar in most respects and point up the very definite need for greater care in the cleaning and preparation of grain that is to be used as seed.

Whilst most farmers sowed recommended varieties and a fairly large percentage of the samples were pure as to variety, the quality and the cleanliness of the seed used, in many instances was anything but good. In Manitoba, for instance, 55 percent of all samples analyzed graded "rejected," which means that the seed would not even make No. 3 Commercial.

The rhinoceros is the rarest species of big game.

Manitoba issues booklet on weeds

A question-and-answer form booklet has been prepared by the Manitoba Weeds Commission on questions dealing with weed control with special emphasis on the use of chemicals.

In addition to brief, concise answers to questions classified under a wide variety of headings, the 15-page booklet contains illustrations and highlights special aspects of weed control methods. Tables list recommended amounts of chemicals to be used

as spray on cereals or flax. Weeds and woody plants common to western Canada are classified as to their reaction to 2,4-D and MCP.

The booklet is available free of charge from the Weeds and Publications branch of the department of Agriculture and Immigration, Winnipeg, or from any Agricultural representative office in Manitoba.

Juarez, Mexico, largest city on the American border, was named for Benito Juarez, liberator of Mexico.

Jane Ashley Says

"Try my favorite recipe for the month"

CHOCOLATE CREAM PIE

¾ cup granulated sugar
4 tablespoons BENSON'S or CANADA Corn Starch
½ teaspoon salt
2½ cups milk
1 square unsweetened chocolate
3 egg yolks, slightly beaten
1 teaspoon vanilla
3 egg whites
6 tablespoons granulated sugar
1 9-inch baked pie shell

MIX sugar, BENSON'S or CANADA Corn Starch and salt in top of double boiler.

ADD milk gradually, mixing until smooth.

ADD unsweetened chocolate; place over boiling water.

COOK, stirring constantly, until mixture thickens.

COVER and continue cooking 10 minutes, stirring occasionally. Do not remove from heat.

STIR a small amount of hot mixture into egg yolks.

RETURN to double boiler immediately, blending mixture thoroughly.

COOK 2 minutes longer, stirring constantly.

ADD vanilla, cool; pour into baked pie shell.

BEAT egg whites until stiff but not dry; gradually beat in sugar, continue to beat until meringue stands in firm peaks.

SPREAD meringue lightly over filling.

BAKE in moderate oven (325°F.) 15 minutes or until delicately brown.

3 tempting whole-wheat varieties from One Basic Dough!

NEEDS NO REFRIGERATION

Make these treats with new Active Dry Yeast

If your family enjoys whole-wheat bread, give them not one but three treats next time you bake! See how Fleischmann's Active Dry Yeast helps you to serve a variety of tempting things with no extra trouble. When you bake at home, make sure you have Fleischmann's on hand.

Basic WHOLE WHEAT Dough

Scald

¾ cups milk
¾ cup granulated sugar
4½ teaspoons salt
½ cup shortening

Remove from heat and cool to lukewarm. In the meantime, measure into a large bowl

¾ cup lukewarm water
1 tablespoon granulated sugar
and stir until sugar is dissolved. Sprinkle with contents of

3 envelopes Fleischmann's Active Dry Yeast
Let stand 10 minutes, THEN stir well. Stir in lukewarm milk mixture.

Stir in

6 cups whole wheat flour
and beat until smooth and elastic; work in 4 cups more (about) whole wheat flour

Turn out on board sprinkled with whole wheat flour and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and set dough in a warm place, free from draught, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead 10 minutes. Divide into 3 equal portions and finish as follows:

1. WHOLE WHEAT BREAD

Shape one portion of dough into a loaf and fit into a greased loaf pan about 4½ by 8½ inches. Grease top. Cover and let rise until just doubled in bulk. Bake in moderately hot oven, 375°, 35 to 40 minutes, covering loaf with heavy brown paper after first 15 minutes of baking.

2. PAN BUNS

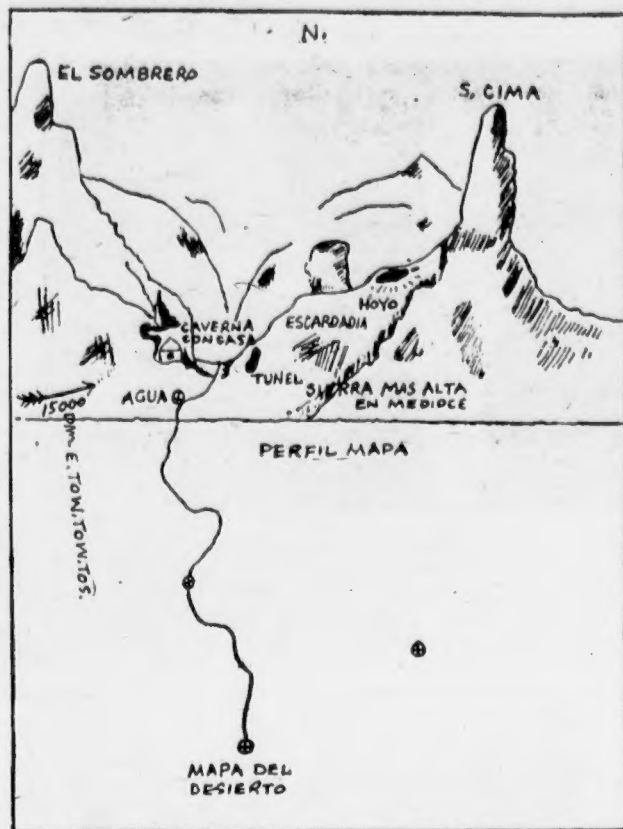

Cut one portion of dough into 16 equal-sized pieces. Shape each piece into a smooth round ball and arrange in a greased 8-inch square cake pan. Grease tops. Cover and

let rise until doubled in bulk. Bake in moderately hot oven, 375°, about 30 minutes, covering buns with heavy brown paper after first 15 minutes of baking.

3. SALAD OR WIENER ROLLS

Cut one portion of dough into 12 equal-sized pieces. Shape each piece into a slim roll 4 to 5 inches long. Place, well apart, on greased cookie sheets. Grease tops. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, about 20 minutes. Split rolls and fill with salad or heated wieners.

Rich gold mine awaits some person named Smith

This is a copy of the old, authentic Lost Dutchman mine map. It's a combination profile and flat map. "Tunel" (mine entrance) has never been found. Map reproduced through courtesy of the Dons club.

By REX STANLEY
(CPC Correspondent)

PHOENIX, Ariz.—If your name is Smith, and your great-grandfather was a gold prospector in the early west of the 1880's, you may be heir to a million-dollar mine. That is, if you can find it.

The mine is a famous one—the old Lost Dutchman, hidden in the rugged crags and gorges of the Superstitions mountains, on the desert near here. And it's really lost, too. Since 1887, some 30,000 searchers have failed to find it. However, with your inheritance, if you're the right Smith, you would get an authentic map. It shows the way to your fabulous treasure—almost. The same men who are looking for the missing heir have tried the chart in the remote, bare mountain range. The faded markings end in a dry, mineless canyon.

There's no question about the existence of the Lost Dutchman bonanza. The Dons club of Phoenix, a group of 50 young men, have been digging into history of the mine for 74 years.

What they've discovered goes something like this:
Two centuries ago, long before

Strictly Fresh

London, England, dentist has really pulled an "acher." Says he won't treat any woman wearing lipstick. This limits him, on the distaff side, to patients under the age of two.

Bill introduced in U.S. Congress would make it legal to send live scorpions through the mail. If passed, there'll be a sting in some letters.

National Arts Foundation makes its third annual appeal for a blank record in each juke box for those who want to enjoy some

I DON'T HEAR NUTHIN'!

George

silence. Or, perhaps, the groan-and-moan industry could attach an earplug dispenser to each babel box.

Students at the college of dentistry, University of Iowa, drill to music. Patients seem to relax when under influence of soft music. Our dentist must have trained on hi-fi, to fast marches, and listened only to the sharps.

"Light as a feather" is one saying in which Connecticut state police don't believe. They recently arrested a truck-driver driving an overloaded vehicle — 31,000 pounds of feathers was the cargo.

America's westward push, Spanish explorers from Mexico stumbled on Indians working a rich gold mine, deep in the barren Superstitions. They seized the mine, enslaved the Indians. Ingots of yellow metal went to the Spanish crown. A few years later, the Indians revolted, massacred the Spaniards, then carefully covered the mine.

This great natural treasure was lost for another century, until three Mexican prospectors found it. A few weeks later, a bearded "desert rat" named Jacob Walz wandered into their camp. He murdered the Mexicans—the start of a bloody saga by this Dutchman to keep the secret of his mountain bonanza.

Five more men crumpled under his guns before he died in Phoenix, in 1887. Nearly everyone in this the frontier town had seen proof of the million-dollar mine; chunks of rich ore, shot through with pure gold, Walz bought his provisions with bits of rich ore. There was a box of ore under the bed in which he died.

According to history, the old Dutchman's last breath was a verbal will of his precious map to a prospector named Smith.

Smith was supposed to be the only real friend Walz ever had. However, even Smith didn't know where the gold-loaded mine was. And he somehow could never find it with the crude map.

So, if prospector Smith was your great-grandfather (and you can prove it), you are welcome to the map and the mine. Of course, there is still the tough job of finding it.

You will be up against more than a maze of sheer chasms and

:: GEMS OF THOUGHT ::

FLOWERS

Lovely flowers are the smiles of God's goodness.—William Wilberforce.

To cultivate a garden is to walk with God.—Christian Bovee.

Flowers are God's thoughts of beauty taking form to gladden mortal gaze.—Anonymous.

Every rose is an autograph from the hand of God on his world about us.—Theodore Parker.

The floral apostles are hieroglyphs of Deity.—Mary Baker Eddy.

There is not the least flower but seems to hold up its head and to look pleasantly, in the secret sense of the goodness of its heavenly Maker.—Robert South.

POLIO VACCINE

VANCOUVER.—About 40,000 children in British Columbia will be treated with the Salk polio vaccine this spring. Dr. G. F. Amyot, deputy health minister, now is working on details of the plan.

raw peaks. Three modern gold-seekers have been mysteriously murdered, looking for the Lost Dutchman.

Other prospectors have been shot at by unseen gunmen, had their camps ransacked, rock slides started above them. Then, there is the Arizona desert country; big, remote, burned by killing heat, dry as a skeleton.

To be safe, you can accompany the Dons club on its annual search for the Lost Dutchman, in March of any year. You will have about 1,500 men, women, and teen-agers to help you hunt through the gigantic jumble of rocks for the key to your map.

The old Dutchman marked his chart with some prominent landmarks in the mountain area—the high pinnacles of El Sombrero, known as Weaver's Needle; a prehistoric Indian cliff dwelling as Caverna con Casa, thus far unfound; and the opposite ridge, as S. Cima or South Top. However, serious, experienced seekers believe some sign is being overlooked.

Whether this treasured mine can be uncovered or not, better check your family tree. If you are the legal heir to the Lost Dutchman, there is a small satisfaction in knowing it—even though your inheritance may remain hidden forever.

In the field of education

Education and the family

By Miss Luella Lovering, Scott Collegiate, Regina, Sask.

Education week begins on March 6 and throughout Saskatchewan conscientious parents will throng the schools. They'll sit in Johnny's seat and leaf through his exercise books. They'll admire art and woodworking and sewing displays. They'll listen to school choruses. Of course they'll talk to Johnny's teacher. Johnny, they learn, is a fine boy, a little lazy perhaps, but of quite superior intelligence. Then they will go home, satisfied that they have learned a great deal about Johnny's education.

Actually they have taken only the first step. What about Johnny's community? Is it law-abiding? Are there wholesome recreational facilities, and if so, is Johnny profiting by them? Does he use the library? Has he joined the band? Does he belong to "Young Peoples"? Or does he spend listless hours on the street corner with the gang?

Those hours from four to midnight may shape his whole life.

What kind of education is Johnny getting in his own home? Has he time to read? Are good books readily accessible? Is the dictionary a family friend? Thus is literary taste created. Does he listen sometimes to good music, and plays and "Capital Report" or is it all sports broadcasts and thrillers?

What about the conversation at the dinner table? Is it gossip and criticism of the teacher, or sane,

fair-minded discussion of questions of civic and national and international importance. Many a statesman got his first inspiration at the family dinner table. Incidental teaching is always the most lasting.

In 1905 there were 25,330 pupils in our schools. In 1954 there are 173,871. They had 821 teachers; we have 7,451. We use radio and visual aids in our teaching. The curriculum has been enriched and expanded. There is a generous fund for loans to aspiring University students.

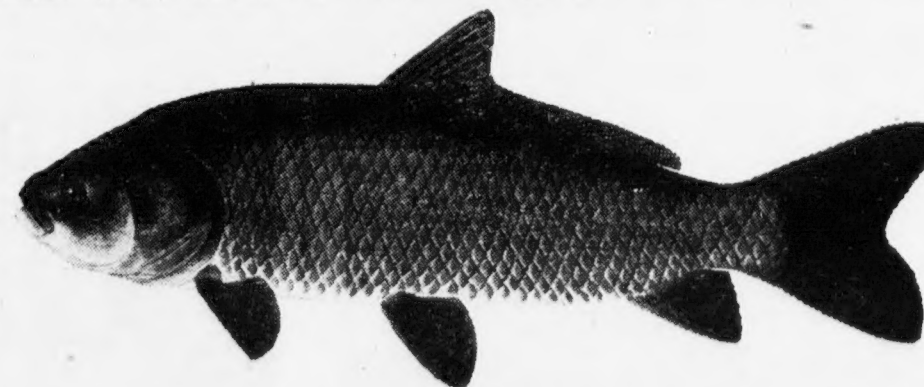

Never before was there a chance for such a broad education. But the co-operation of the home and the community is needed to help Johnny make the best of the fund of knowledge available to him.

White coal is a figurative term for water power.

Carp is menace to sports fishing

THIS IS THE CARP, menace to sports fishing, which in recent years has invaded some Saskatchewan waters and now poses a threat to others including the North and South Saskatchewan Rivers. Generally similar in appearance to the buffalo fish, it is most readily distinguished by the barbels or "whiskers" growing downward from each side of the upper jaw.

THIS IS THE BUFFALO FISH, which may be confused with carp because of its generally similar appearance. The buffalo fish is common in such Saskatchewan waters as Last Mountain Lake, but does not constitute a serious threat to sports fishing.

THESE ARE THE MAJOR WATERSHEDS through which carp, if unchecked, may infest many of Saskatchewan's finest sports fishing waters. The first carp reported in Saskatchewan were found in the Assiniboine River near Kamsack, in 1953. They were later found in the Qu'Appelle river in 1954, and more recent discovery of carp in the north end of Lake Winnipeg opens the Saskatchewan River and its tributaries to the further advance of this destructive fish. The Souris River and Frenchman Creek are also open to invasion from the south and east, although carp have not as yet been found in these latter streams.

World Happenings In Pictures

"THIS ONE WILL REALLY SLAY YOU" — Dr. William A. Irwin, of Detroit, Mich., exhibits a prized item of his extensive gun collection: a violin that's nothing to fiddle with. A .44-calibre pistol barrel is fitted into the scroll; trigger protrudes from underside of neck, and cocking hammer is fashioned to resemble part of the scrollwork. The instrument, at least 75 years old, is believed to have been fashioned in Pike County, Ky., heart of the legendary feudin' country.

PIN-UPS FOR DAIRYMEN—Pollsters would probably find that curvaceous calendar cuties run a poor second these days as pin-up favorites in the eyes of dairymen. Much more seductive curves are those envisioned by milk producers on future sales charts as world political figures lend their faces to milk-consumption programs. At left, Premier Pierre Mendes-France registers enjoyment of milk, during his campaign to increase its consumption and decrease the intake of alcoholic beverages in France. West Germany's chancellor, Konrad Adenauer, centre, hoists a gift carton of milk, one of many from all dairying sections of West Germany. And Agriculture Secretary Ezra Taft Benson, right, downs a token toast to the more than 2,500,000 pints of milk consumed in Chicago, Ill., under the government's school milk program.

LT -CMDRS. RON HEATH, of Courtney, B.C., and William Walton of Port Credit, Ont., pose aboard the U.S. Carrier Yorktown where they are temporarily stranded. The Canadian pilots, on exchange with the U.S. Navy, were aboard the carrier when it was diverted suddenly to Formosa. The navy says the Canadians won't be involved if hostilities break out between the United States and the Chinese Communists.

CAT'S MEOW: Starlet Adelle August at "leash" gives the Hollywood cameraman an excuse for taking her picture. She's curbing kitty on a leash in anticipation of an attempt to pass a cat-control law.

ARTISTICALLY INCLINED—Drew Callimachos, eight, tries a pose like Verrocchio's statue during a visit to the National Gallery of Art in Washington. He was on a tour of the gallery with schoolmates.

HERE'S A '56 OLYMPIC PREVIEW—Scenic Cortina D'Ampezzo, above, background, in the Dolomite Mountains of northern Italy, will be the site of the 1956 Winter Olympics. Below, workmen at Melbourne, Australia, tear down old grandstand at cricket grounds preparatory to enlarging seating capacity to 43,000 for the 1956 Summer Olympics. Total spectator capacity of the grounds will be 104,000.

BUDDHA IN EXILE: The Chag Chia, the "Living Buddha," poses before his shrine on Formosa, where he sought sanctuary from Chinese Communists in 1949. Claiming to be in his 19th reincarnation, he heads the Chinese Buddhist Association, is said to be titular head of all Chinese Buddhists.

LEVELS OFF

REGINA.—Movement of farm population from rural farm areas to towns and cities in Saskatchewan levelled off in 1953, according to current provincial reports. Urban centres still showed increases, with towns having the greatest proportional gains.

Built by mission priests more than 200 years ago, a ditch in San Antonio, Tex., still is used for irrigation.

AERIAL ACTION—Who's socking whom in this British soccer match? The referee called a foul against Ron Reynolds, left in air, Tottenham's goalie as he defended the net against flying Port Vale attacker.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

Athletic nutrition important

The single most important factor in the development and sustaining of physical fitness is sound nutrition. This is also true for every age and every type of person.

Eat mostly simple foods—lean meat, fish and poultry—lots of cheese, milk and eggs—and plenty of enriched or whole grain bread. At breakfast always include a whole grain cereal. Above all, don't neglect fresh fruits and fresh vegetables.

Try to develop the big breakfast habit. Actually this is the most important meal of the day. You should eat at least one third of your total food at breakfast time.

A tip for defencemen

One of the most common mistakes that defencemen make is that of getting excited and rushing at a puck carrier. Others, equally important are: being caught standing still; not getting back into position quickly after a play; not digging and chasing hard enough and close enough; taking your eye off the puck and letting the puck carrier cut inside—if the defenceman can't do anything else he can spoil the puck carrier's shooting action.

Thus, to improve your skill in playing this position, develop a quick break. This is very important. So is a hard shot that you can keep low (for shots from the point during ganging or power plays), and accurate passing.

It is more important for a de-

fenceman to pass accurately than almost anyone else because getting the puck out of your own zone is so vital in modern hockey.

A basketball shooting tip

Relax before you shoot! Here's the idea: Just before you shoot let all your muscles sag (try to feel like a limp dishrag all over.) As you sag let the air out of your lungs with a quick exhale through the mouth. The exhaling action will help relax those muscles. Just practise shooting this way and watch your shooting improve.

Wet weather reduces laying

The adult grasshopper survey in Alberta conducted by science service division, Canada department of Agriculture, indicated a marked increase in numbers over the last three years. The cool wet weather of September, however, restricted egg laying to the extent that the number of eggs deposited was only 25 percent of what normally would be expected and the forecast for 1955 shows the severity of the infestation to be greatly reduced as compared with that indicated by the adult survey.

LATE WINTER

Lilac bushes standing waist deep in snow;
The woodpile looking like an iced sponge cake;
The bob sleigh trail leading away across the pasture,
And acres of gleaming whiteness without a break;

The ashpile in the lane growing higher;
The winter's coal dwindling faster each day;
The children's ski pants shabby at the knees,
And the novelty of skating wearing away;

The lengthening days being eagerly proclaimed;
The indoor bulbs pushing forth slow flowers—
All these tell us of a waning winter
To make more durable the long cold hours.

The name of San Francisco's famous Golden Gate is said to come from the dazzling golden effect of the sun on the water.

Weekly Tip

DISHCLOTHS

The best dishcloths are those made of knitted cotton; they will outwear any others. Boil them frequently in strong soda water and dry them in the sun.

WEEKLY BIBLE COMMENT

CHRISTIANS EARNED THEIR NAME IN WICKED CITY

The principal setting of the scenes and events of the New Testament, especially the Four Gospels and the life of Christ, was in Palestine.

But a broader setting involved a great part of what was then the known world as the number of disciples increased.

The city of Damascus, for instance, to which Paul was journeying when his conversion changed his whole life, is said to be the world's oldest city. Its origin dates back to as long before the birth of Christ as our time has been since Christ's birth. It has been said that it was a city before Babylon began.

Damascus was the royal city of Syria; there are numerous references to it in the Old Testament and the records of the wars of Israel. The single New Testament

reference is in connection with the conversion of Paul. But it is interesting that a group of Christian disciples were already there, bringing the new life of the Gospel to the oldest of all cities.

It was a different challenge that Christianity met at Antioch, about three hundred miles north of Jerusalem, in a very new city. Antioch was then a city of about half a million people on the great line of trade between east and west. In its splendor it aspired to surpass all other cities of that ancient world.

But with all its wealth, culture and pagan grandeur, Antioch had a sinister distinction. It was the wickedest, most licentious city of its time. Yet it was here in Antioch that the disciples were first called Christians.

It is a symbol of the Christian Gospel and way of life, ever opposing and conquering evil; establishing a new culture and splendor upon moral and spiritual foundations.

There are more conventions held in Chicago than in any other city in the world.

Here's the Answer

Home Workshop

The arrangement of wide and narrow shelves in this wall cabinet makes it possible to store a complete service of dishes for eight people in the lower compartment. Overall the wall cabinet is slightly over a foot deep, two feet wide and three and a half feet high. It is hung flush with an eight-foot ceiling. A work space of sixteen inches is allowed between the wall and floor cabinets. Dimension may be adjusted to suit. The two cabinets may be ordered separately at 35c each, or they will be included in the packet of patterns for remodelling kitchens at 1.50 postpaid.

Here is a workbench that will stand up under the most rugged use. The reason is that it has a heavy base that is screwed and bolted together. The bolts supporting the screws at points taking the most strain. The top, made of 2- by 3-inch stock bolted side by side gives a good solid working service. A useful feature about this bench is that an extension for power tools may be attached to the end. Your power tools are fixed to individual bases of plywood which may be interchanged on the extension in a jiffy, using bolts with wing nuts. Where space is limited this is a practical outfit to use various tools with only one motor. Patterns are 35c each. Order 338 for the bench and 337 for the extension.

The north magnetic pole is in Canada. 3130

Only 57 forest fires in Sask. last year, second lowest mark

There were only 57 forest fires in Saskatchewan last year, the second lowest number on record. The record low of 46 was set in 1951. Officials of the provincial natural resources department's forest fire control branch said total suppression costs amounted to \$12,000, while total timber losses were only about one percent of the average over the past 24-year period.

The forest fires burned over an area of 4,227 acres. Of this, 427 acres were outside of main protected areas. The unusually low forest fire losses for 1954 were attributed to wet weather and quick suppression action on fires which did break out. The fires in nearly all cases were brought under control before they could cause extensive damage.

A breakdown of types of fires occurring during the year showed there were 24 class A fires (covering zero-one-quarter acres), 13 class B fires (one-quarter-ten acres), 13 class C fires (ten-100 acres), five class D fires (100-500 acres), and two class E fires (500-plus acres).

Agriculture gets most research

Probably no other industry in Canada has as much research directed towards increasing its efficiency as agriculture. Hundreds of workers from coast to coast at federal and provincial experimental farms and research laboratories are making intensive studies of a wide variety of agricultural problems.

These range from studies in animal nutrition to development of disease resistant crops; from soil conservation to woodlot management; from the effects of soil conditions to the economics of recently developed pest control chemicals.

In universities and at science service laboratories answers are being sought to such questions as: How do insects develop resistance to insecticides? Can some of the diseases affecting plants and livestock be reduced by feeding trace minerals? A new tool has been placed in the scientists' hands—radioactive tracers—which makes certain phases of their work infinitely easier.

Industry too is playing its part by providing better fertilizers and more effective chemicals for killing weeds and insects. Test plots are maintained to study how industrial products can best be used to increase crop yields and provide more abundant food supplies for all Canadians.

Once the work of research has borne fruit, the information is passed to the farmer in many ways. The story is told in newspapers and farm magazines; over the radio and on television. Pamphlets and motion pictures are made readily available to junior farmer short-courses and adult study classes.

Quick Canadian Quiz

1. What territory, adjoining Canada, was once known as Russian America?
2. In Canada's retail stores are more men or women employed as sales clerks?
3. What proportion of Canadian households have automobiles? Washing machines? Telephones? Mechanical refrigerators?
4. Federal government spending on defence totals \$2 billion this year. Is this more, or less, than Ottawa's non-defence spending?
5. In 1945 Canadian manufacturing workers earned on the average \$30.98 a week. What is the average weekly pay today?

(Answers in another column)

Smile Of The Week

A mother, her arms filled with groceries, boarded a bus with her daughter, aged five. The girl had the fare and dropped it in the box, but seemed to feel an explanation was in order. "I'm paying the money," she told the driver in a voice clearly audible at the back of the bus. "My mother is loaded."

The Amazon river is 3,900 miles long. 3130

Camp fires caused most

The greatest number of fires—24—resulted from camp fires not properly extinguished. Smokers caused three, settlers seven, lightning eight, industrial three, incendiary four, unknown five, unclassified three.

Over 50 percent of all forest fires last year—34—occurred in the resources department's northern administrative district. This was due mainly to the fact that the far North has less rainfall than more southerly regions. Most of the northern fires resulted from campfires started by tourists, trappers and prospectors, with lightning the next most frequent cause.

The Prince Albert district had 11 forest fires, most of them very small and causing little or no damage. The eMadow Lake district had four fires and the Hudson Bay district only two.

There were only two forest fires of any size in the province's forested regions last year. One, in the Hudson Bay district, which burned over 600 acres, was started by lightning. The fire, which destroyed only five acres of merchantable timber, was fought and brought under control by smoke jumpers and department field personnel.

The other big fire broke out near Uranium City, in the heart of Saskatchewan's Beaverlodge uranium field, and was believed caused by a careless smoker.

Helpful Hints

Turpentine will remove almost any kind of spot from unfinished floors without making the wood darker.

If you're teaching a daughter to sew and you can't afford mistakes, let her start on crepe paper. Save scraps for her to try fancy stitches or the machine on. Let her start with a super-simple printed pattern.

Your meat or bread board won't slide around if you put rubber tacks on the bottom of it.

To make shoes waterproof apply a dressing made by melting together two parts of beeswax to one part of mutton fat. Apply at night and remove the next morning by wiping with a piece of flannel.

Only about 40 percent of the radiation received by the earth from the sun is in the form of light that can be seen.

Early cut hay best for calves

Using identical twin dairy calves, Prof. Gullickson, of Minnesota, has shown that higher daily gains can be expected when early cut hay is fed rather than late cut hay of the same type. Analysis of the early cut hay showed it to contain one and one-half times as much protein; almost three times as much carotene, and six percent less fibre than late cut hay. Calves, fed on the better quality hay which had been harvested at the right stage of maturity, gained 0.43 pounds more per day than their twins, fed on the late cut hay.

Postage stamps first were issued in England, in 1840.

Hobart is the capital and largest city of Tasmania.

::: APPETIZING RECIPES :::

Chocolate Pudding and Sauce are quickly prepared with milk powder mix. For chocolate trifle,

CHOCOLATE MIX
2 cups milk powder
1 1/3 cups sifted all-purpose flour
2 teaspoons salt
2 cups granulated sugar
1 cup cocoa

Combine all ingredients in order and mix thoroughly. Sift. Put into glass or metal containers.

Close containers tightly and store on shelf. Use to make chocolate pudding or chocolate sauce.

CHOCOLATE SAUCE
2 cups water
1 cup chocolate pudding mix

pour chocolate sauce over white cake squares. Next day, cut leftover cake in strips and top with chocolate pudding.

1/4 cup sugar
2 tablespoons butter
1/2 teaspoon vanilla

Combine pudding mix and sugar in top of double boiler. Gradually add water. Then place over boiling water and cook for 10 to 12 minutes, stirring constantly. When thickened remove from heat and cover and cool. Makes about 2 cups sauce.

For added milk value, 2 cups fluid milk may be substituted for the 2 cups water.

Municipalities can participate in erecting historic markers

Harry Ford, the pioneer wheelwright from Humboldt, who made 15 full-size Red River carts last year to mark where present highways cross historic trails of the Province's earlier days, has returned from the Coast to construct another six carts for the Saskatchewan Golden Jubilee Committee. He will resume operations in the woodworking shop at Regina jail where he supervises the work of inmates, assisted by instructor George Perfect.

WHEELWRIGHT Harry Ford talks about construction details to Jack Herbert, director of historic sites for the Saskatchewan Golden Jubilee Committee. This is one of the full-scale models of Red River carts which will be used as Saskatchewan historic site markers.

According to Jack Herbert, director of historic sites for the Jubilee committee, all Red River carts will be placed in their permanent locations under gable-roof shelters as soon as the weather permits in the Spring. Most of the shelters are already erected, together with inscriptions telling why the spots are historic and identifying the old trails.

At least three of the new carts made by Mr. Ford will be used in Jubilee parades and pageants this summer and fall.

For municipalities

Rural municipal councils will be invited to mark the route of these old trails through their municipalities as a Jubilee project. Mr. Herbert also announced. The trails have been accurately charted across the Province through research by Tom Petty, of Indian Head, and will be drawn on municipal maps according to old records of Township and Range. Photostat copies will be made available to meet an anticipated heavy local demand.

The Jubilee Committee hopes that the municipalities will erect small aluminum markers where the old trails cross main municipal roads. A copy of the appropriate

map showing recommended marker locations, a plan of the marker design and an estimate of the cost will be submitted to each municipality, together with an invitation to participate in the Jubilee marking program.

The Historic Sites sub-committee, said Mr. Herbert, will be responsible for all research, cost estimates and the taking and filling of orders for markers. The municipality will pay only the cost of the markers and the labor costs for placing them.

ANSWERS TO QUICK QUIZ

5. \$57.70 per week. 3. Automobiles 55 percent; washing machines 83 percent; telephones 69 percent; refrigerators 71 percent. 1. Alaska, which was bought by the U.S. from Russia in 1867. 4. Ottawa's non-defence spending this year will be about \$3 billion. 2. Of 180,000 sales clerks, 95,000 are women.

(Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.)

Many varieties of orchids are as common in their native tropics as tulips in Canada.

On The Side : By E. V. Durling

Widows left with three or more small children to support usually find it difficult to interest a man in matrimony. Widowers, with three or more motherless children, also have trouble in finding a matrimonial mate willing to become a stepmother to a group of youngsters. So, widows with small children should look around for widowers with a flock of kiddies. Consider the case of Henry Dorling of Epsom, England, who was left a widower with four small children. He married Mrs. Isabella Mayson, a widow with four young offspring. After Dorling and the charming widow Mayson married, they had 13 children of their own! That made 21 children in all!

They mean it's good for you?

How long does it take you to get over a common cold? Should take about a week. Many medical men think it is a mistake to try to cure a cold too quickly. Let it run its course. These physicians claim a cold is one of nature's ways of cleansing poisons out of the system and that the sufferer is in better health after the cold is over.

The truth about camels

To say a camel can go eight days without a drink of water is giving voice to an incomplete and misleading statement. A camel cannot go eight days without a drink in the summer. His limit then is three days. In the winter he can go 10 days without a drink of water. It should be kept in mind that a camel drinks about 20 gallons of water in one gulp.

Rights of a war hero

What war veteran of your acquaintance has the most decorations? Do you know any having the French "Medaille Militaire"? Possessor of that has special privileges in France. Said Mr. Churchill, "Now if I am ever arrested for being drunk and disorderly in Paris the police cannot take me to jail. As a holder of the French Medaille Militaire they will have to put me in a taxicab and take me to my hotel and send the bill to the president of the republic."

Something to look forward to

The last child of a family is usually the smartest of all the children and has the greatest chance of achieving success. So research on the lives of successful men indicates. As for example, the famous Italian tenor, Caruso, was the last of 18 children. Gainsborough, the painter, was the ninth and last child of his family. Samuel Taylor Coleridge, U.S. president, was the 11th and last offspring of his parents.

Interesting comparison

"A kiss without a moustache is like an egg without salt," according to an old Spanish proverb. The ladies of Spain may feel that way about it, but so does a young matron of Manhattan who frankly confessed she was in complete agreement with the Spanish idea. Said she, "My husband has a moustache. His kisses produce a most ecstatic reaction." Several other women made somewhat similar statements. However, the majority appeared to be in agreement with Ann Sheridan, who once observed, "Being kissed by a man with a moustache is like falling face downward on a broom."

Forewarned is forearmed

The one of a married couple having the widest forehead above the ears is the one who actually rules the household whether it seems so or not. So some research on life among the married indicates. Better get a tape measure and check on this, sir. Maybe your wife is dominating the domestic scene and you don't realize it. If you know just what the situation is, you can defend yourself better.

OUR COMPLETE SHORT STORY—

Welcome insult

—By KATHRN BEMIS WILSON

JOE WOOD strutted across his neatly clipped lawn to his newly acquired coupe parked out front. He had reached the age of 50 still sensitive about his short body. But this morning was different. The world was his apple. In this shiny second-hand car, he could drive to his accounting job at Western Aircraft looking as well-heeled as anybody.

Molly, his plump little wife, called from the bungalow's porch, "Remember, Joe—don't pick up hitchhikers—it's dangerous!"

"I'll be careful," promised Joe, opening the car door.

He climbed in behind the wheel, thinking, "Molly needn't worry. Nothing but first-class passengers will ever ride in this bus!"

The car was taking Laurel Canyon's hairpin turns like a veteran when Joe abruptly pulled the emergency, squealing his tires to a halt. It was the innocent, travel-stained countenance of the young man with upturned thumb which had aroused Joe's compassion. The fellow's hatless head flaming red under the sun, pierced straight through Joe's susceptible heart. It reminded him of the son he should have had years ago.

Automatically, he smoothed back a lock of his own graying hair, his blue eyes eager. "Hop in, young man," he invited.

"Thanks, pal," Joe flashed him a covert glance as the car began moving. Had he hunted for an uncoursed down-and-out he couldn't have found a better example.

"Going far?" hazarded Joe. "That—depends."

"You sound a little discouraged."

"So'd you be, mister, without a dime in your jeans to buy cats."

More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome loose plate discomfort. FASTEETH, an improved powder, sprinkled on upper and lower plates holds them firmer so that they feel more comfortable. No gummy, gooey, pasty taste or feeling. It's alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTEETH today at any drug counter.

ITCH STOPPED IN A JIFFY

Very first use of soothing, cooling liquid D.D.D. Prescription positively relieves raw red itch—caused by eczema, rashes, scalp irritation, chafing—other itch troubles. Greaseless, stainless. 39¢ trial bottle must satisfy or money back. Don't suffer. Ask your druggist for D. D. D. PRESCRIPTION.

to a complete halt. The gun pointed through the open window on Cherub-face Al's side, commanded his immediate respect.

"Com'on, kid!" said the officer, yanking open the car door. "Pick my pocket, will you?"

The flicker of a smile crossed the dip's face as his hands went up. Something small and black dropped from his dirty shirt-sleeve. "Yeah, Copper—guess it's your deal," he drawled brazenly, as he stepped to the ground.

"Well, I never!" gasped Joe. "How'd he ever manage to—"

"Okay, Wood! Forget the ticket! Get going!" gruffly ordered the officer. "Hell! This tin can of yours couldn't do ninety!"

(Copyright Wheeler Newspaper Syndicate)

Threshermen's reunion July 3 to 9

The old gray mare may not be what she used to be but she will be prancing in the limelight once again.

About 30 horses and two yoke of oxen will be used for demonstrations of pioneer life to be held at the threshermen's reunion in Saskatoon, July 3 to 9, as part of the Saskatchewan Jubilee celebrations.

Planned by the Western Development Museum, the program will include sight-seeing tours in democrats, covered wagons, stage coaches and top buggies as well as live demonstrations of various pioneer farming techniques.

J. L. Phelps, museum board chairman, has issued an appeal to

all horse owners within trucking distance of Saskatoon willing to rent or loan well broken and quiet horses to get in touch with the Western Development Museum at 1830 Eleventh St. W., Saskatoon.

Also needed are good work and show harness, light and medium team and single driving harness, tandem hitches, four and six horse equalizers and a set of pulley hitches for six and eight horse tandems. Regular and side saddles are sought as well as old type women's riding costumes, fancy and working cowboy outfits.

Two trained yoke of oxen and a man who could give any special training needed by horses in performing particular jobs are also wanted. A walking plow and a three-furrow horse gang, both in good working condition, are being sought.

Hot Biscuit Supper Sandwich

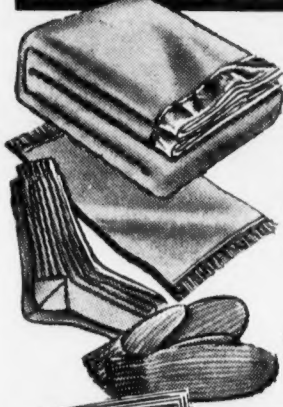

Season to taste 1 c. minced cooked meat with grated onion, salt, pepper and condiment sauce; moisten slightly with gravy or sauce. Sift twice, then sift into a bowl, 2 c. once-sifted pastry flour (or 1½ c. once sifted all-purpose flour), 4 tps. Magic Baking Powder, ½ tsp. salt, ½ tsp. dry mustard. Cut in finely 5 tbs. chilled shortening. Make a well in dry ingredients and add ½ c. chili sauce and ½ c. milk; mix lightly, adding milk if necessary, to make a soft dough.

Knead for 10 seconds on floured board and divide dough into 2 parts. Pat one part into a greased round 8½" cake pan and spread almost to edges with meat mixture; moisten edges of dough with water. Pat second part of dough into an 8½" round and place over meat mixture; press lightly around edges to seal; score top layer deeply into 6 pie-shaped wedges. Bake in hot oven, 425°, about 20 mins. Serve hot with brown tomato sauce. Yield—6 servings.

WARBLE CONTROL TIME IS APPROACHING

Last spring the field supervisor Mr. Ruby sprayed over 2000 head of cattle in the Municipality of Kneehill for warble control. This service is available again this spring at a cost of 25c a head. If you wish to take advantage of this service, contact either Mr. Ruby or myself, as Mr. Ruby wishes to draw up his itinerary.

TREE PLANTING

Now is the time to place your application for trees for 1956 planting. By placing your order now you assure yourself of the trees you want for 1956 as well as giving the land you are going to plant to trees a good summer-fallowing in 1955. With the tree planters that each Municipality now owns, the planting of trees is much simplified.

Application may be made at this office or with either of the Field Supervisors, Mr. Robertson or Mr. Ruby.

The Junior Red Cross in the schools which is growing every year, assists in Canadian programs as well as helping less fortunate children overseas.

The work of mercy never ends.

RUST CONTROL WHAT'S IT WORTH?
The staggering losses from rust in 1954 have emphasized the urgent need for intensified research on the rust problem. What financial benefits would the control of rust bring to the farmers of Western Canada? This can best be illustrated by the tremendous toll that stem rust of wheat alone has taken in the Prairie Provinces since 1916.

Concrete Evidence For the 16 years, 1916-28, 1930, 1935 and 1937, that is, before Thatcher and other rust-resistant wheat varieties were grown on any extensive scale, the average annual loss in farm income in Western Canada from stem rust was \$47,500,000. In 1916 alone the financial loss was \$234,000,000; while in 1930, and again in 1935, it was not less than \$150,000,000. Race 15B of stem rust reduced farm income in the "rust area" of Western Canada in 1953 by \$29,000,000. And then came 1954! Last year, stem rust and leaf rust of wheat stole at least \$200,000,000 from the farmers of Western Canada.

It Can Happen Again. The rust tragedy of 1954 is not likely to be repeated in 1955. However, let's not bury our heads in the sand—it can happen again! The control of rust is not a "hit or miss" proposition. No, rust control can only be accomplished by well-planned, continuous and co-ordinated scientific effort (research).

More Research Needed. The devastating rust epidemics of 1954 point up the tragic need for concentrated research on the rust problem, and the intensification of all control efforts. If, in the years ahead, sudden and disastrous rust losses are to be prevented, the fight against rust must be carried on continuously on a broad front. As cereal rust research is mainly a governmental activity, the farmers of Western Canada should demand that more financial assistance and facilities be provided immediately for rust control research. Needless to mention, an investment in rust research is truly an investment in the future welfare of the agricultural industry of Western Canada.
